

## LEGO TECH

Suits ages 30 months – 60 months

### ***What you'll need:***

- Card
- Coloured pencils
- LEGO blocks

### ***What you do:***

1. Prepare some suggestion designs by drawing and colouring LEGO block towers on pieces of card with specific colour patterns.
2. Leave the suggestion designs by your LEGO resources, and encourage your child to try and recreate the patterns with their own real-life LEGO block towers.
3. You can even ask your child to help make the suggestion cards to begin with too. For the more adventurous, you can create elaborate designs that look like structures such as a house or car.

This activity is very good for improving pattern recognition and counting skills by encouraging your child to follow the tower guidelines to re-create their own.

This can be extended by matching and sorting colours of other objects to the cards, and increasing this in difficulty.
